

Keep Our Children Safe

Keep Our Children Safe

*"I looked away for just a second...
I just didn't think..."*

*"I just ran to answer the phone...
I just didn't think..."*

*"It was just a few inches of water...
I just didn't think..."*

Many Oklahoma children drown each year in bathtubs, swimming pools, ponds, ice chests, mop buckets, hot tubs, toilets, sinks and aquariums.

A couple inches of water and a child left alone are all it takes to create a tragedy.

A responsible adult watching a child at all times is the best prevention to drowning and injuries.
